

# TiborLight® Spring Creek CL & Tail Water CL Models

## MAINTENANCE

Tibor Light® reels require virtually no maintenance. Occasionally, a few drops of TiborLube™ should be applied to the ConstaLube™ Felt. If sand or dirt gets into the reel, simply remove the Spool, flush with fresh water and reinstall the Spool. Aside from the Drag Felt, there is nothing on the reel to lubricate.

## CONVERSION FROM LEFT TO RIGHT HAND RETRIEVE

Tibor Light reels are shipped from the factory with left hand retrieve unless specified. An authorized dealer can easily convert your Tibor Light CL reel from left to right hand retrieve for you. You may also convert the reel yourself in three easy steps by rotating the Clutch Pins on the Brake Drum.

*Please refer to the numbered parts list on the reverse side.*

1. Begin by tightening the Drag Adjustment Screw (part #7); then loosen the Retainer Knob (part #17) and remove the Spool (part #14).
2. Using a small screwdriver, simply press and rotate both Clutch Pins (part #12) 180° so that the “slope” of the Pins faces the opposite direction.
3. Replace the Spool and tighten the Retainer Knob.
